

My name is Matthew Clark. I am a resident of Meriden, CT. I am a special education teacher in Milford, CT. I work with students who have autism and work daily with certified behavior analysts. I also have a cousin with autism who receives services in Massachusetts. I have seen the difficulty parents have in receiving and selecting services. I believe this legislation could go a long way to improving the quality of life for my students and their families. I urge you to please support this bill.

Thank you.
